

ONLINE TRAINING SYLLABUS

Mouse Carotid Artery Catheterization

Objective: Students who attend the Mouse Carotid Artery Catheterization online training program will learn the basics of what it means to successfully prepare for and perform a catheterization surgery in mice, as well as follow along as the instructor demonstrates a successful catheterization and implantation of the Vascular Access Button™.

Following course completion, students will have password protected access to PDFs of each presentation covered during the session for 60 days including:

- Rodent Surgical Guidelines
- Surgical Instruments
- How to Measure Catheter Insertion Length
- How to Achieve Optimal Patency Duration
- Catheter Maintenance and How to Access the Vascular Access Button™
- Detailed Standard Operating Procedure
- Annotated video of the surgery
- Certificate of Attendance

Part number: TRSRG-V3HR-MCAC
